

Management Policy

President & CEO Shinichi Ata

Achieve significant growth

Change in Operating Income (billions of yen)

Our Vision

Evolve from an IT vendor

into a business partner

Contribute to growth of core businesses and creation of new businesses

Basic Strategy (Issues to Address)

To create No.1 business fields and continue to produce new value

Cloud Integration

IoT Business Development

Build a Solid Profit Structure

Cloud Integration

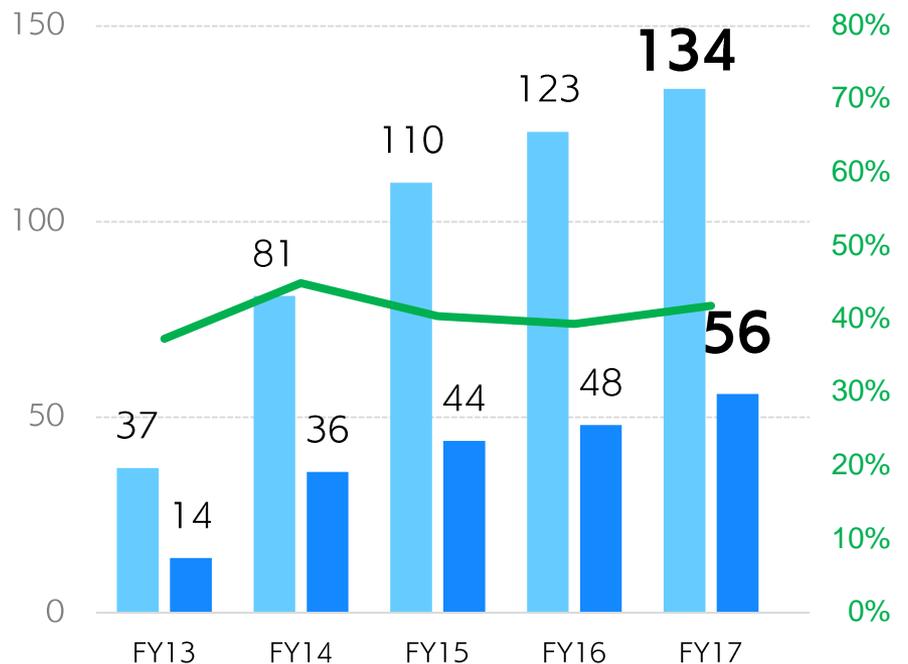

Specialization in Cloud-related
Businesses

Moving Systems and Businesses
to the Cloud

Creating Services from Expertise
developed on various projects

Specialization in Cloud-related Businesses

Business Performance in Three Key Businesses (Cloud, Security, Big Data)

Sales
Distribution Ratio **27%**

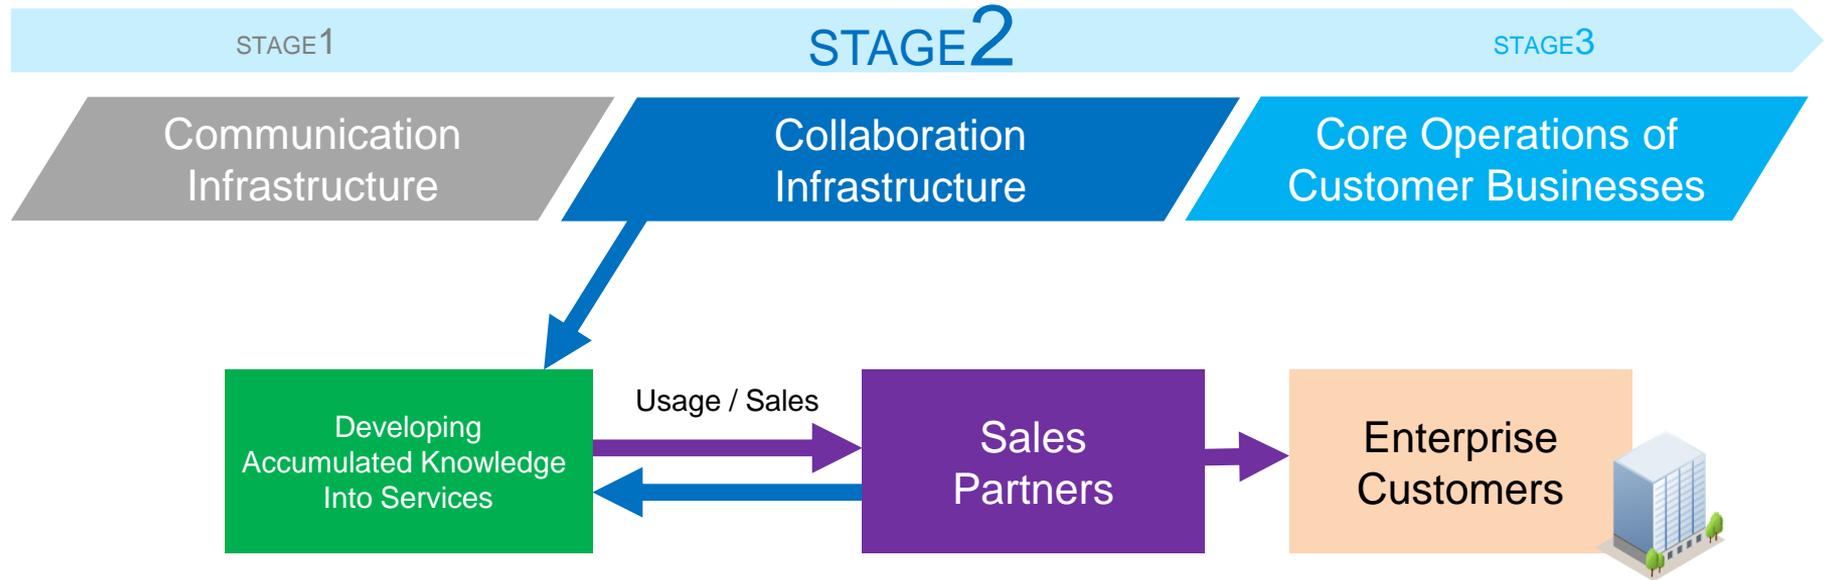

Marginal Income
Distribution Ratio **40%**

Combine key businesses
with high profit margins and
achieve continual growth

Improve operating income
by raising the distribution ratio

■ Sales ■ Marginal Income — Marginal Income Ratio
(100 million yen)

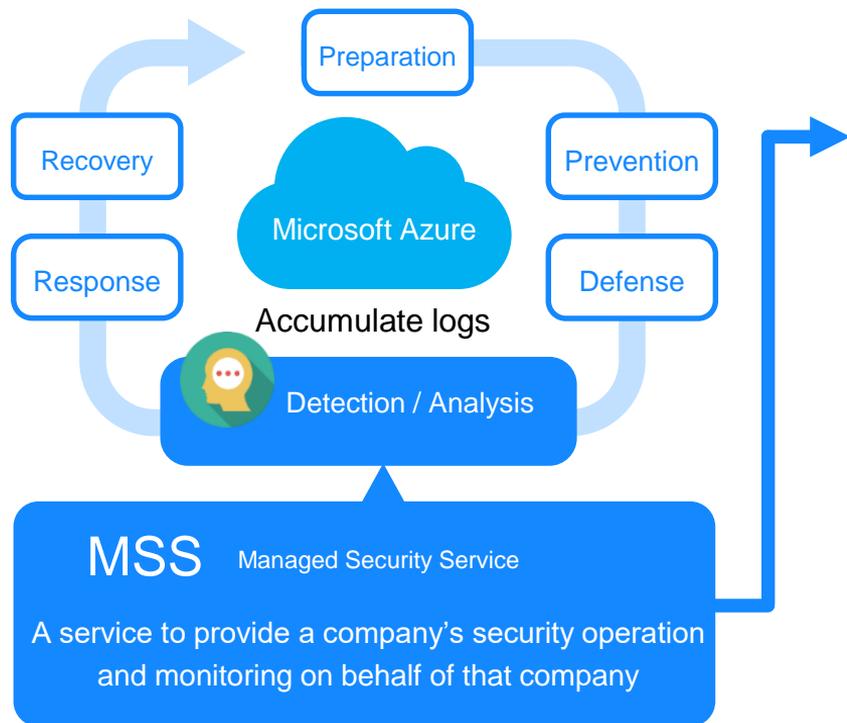

Creating Services from Expertise Developed on Various Projects

Moving from a direct sales-only structure to a sales expansion structure for company-provided services

Example: Managed Security Service

MSS in the security measures process

- Extensive track record of introduction and operation at local governments, etc.
- Supports a wide range of security products
- Introduction of an AI-enabled log analysis infrastructure

Expanding sales with
channel sales through partners

IoT Business Development

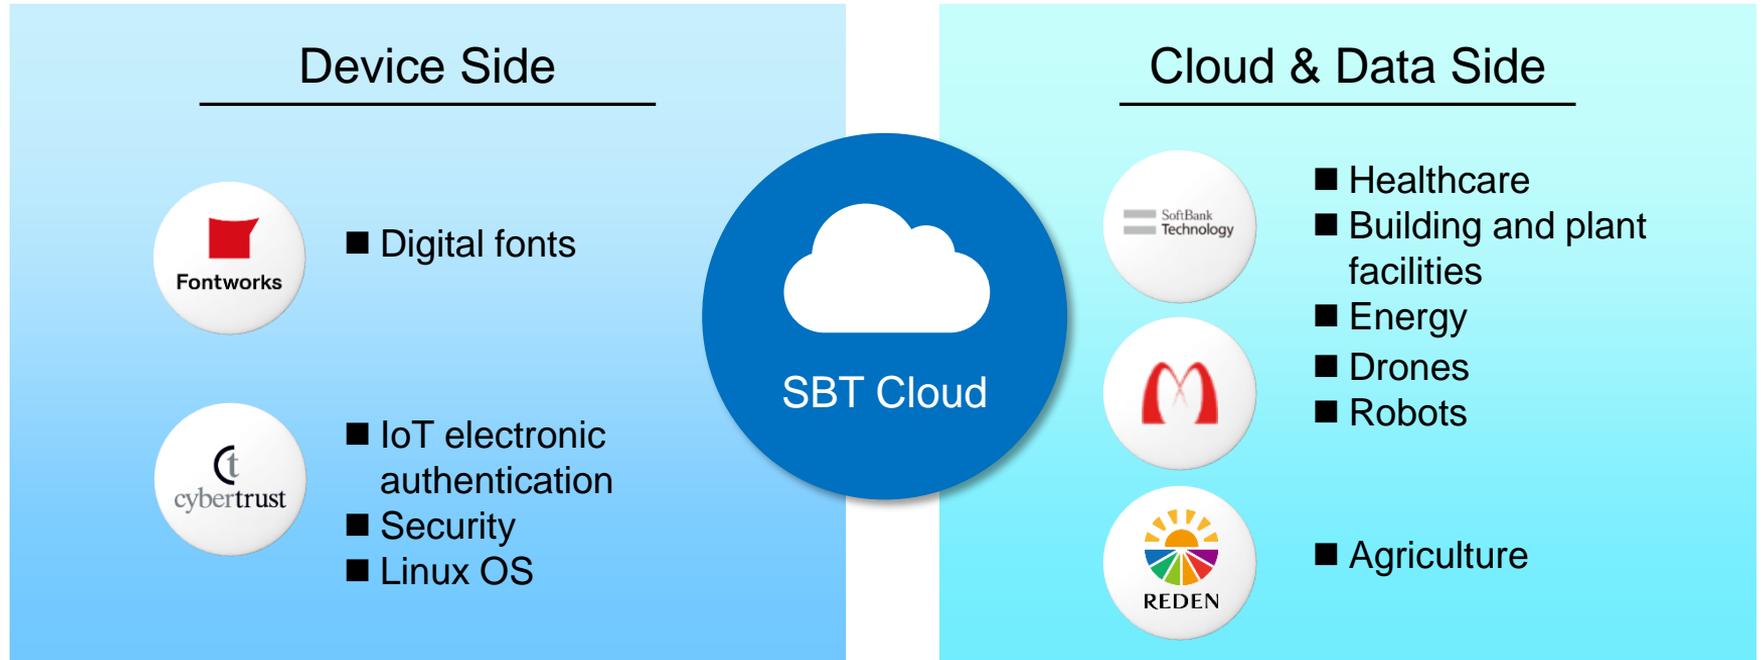

Delivering One-stop IoT Services

Implementing Proactive
Proof of concepts

Progress in the Area of IoT Devices
- Policies in Cloud & Data Areas

Delivering One-stop IoT Services

Implementing Proactive Demonstration Tests

Developing Partners

- Partner agreement with ARM Limited
- Providing technical support to Renesas Electronics
- Basic agreement on joint venture with Rambus Inc.
- Basic agreement on joint venture with Taisys Technologies Co., Ltd.

Various Demonstration Tests

Provision of cloud-based AI modules to manufacturers

Diagnosing security vulnerabilities in the IoT devices installed in office buildings

Utilization of drones in agriculture

Verifying volunteer identities and measuring their movements

Pepper-related

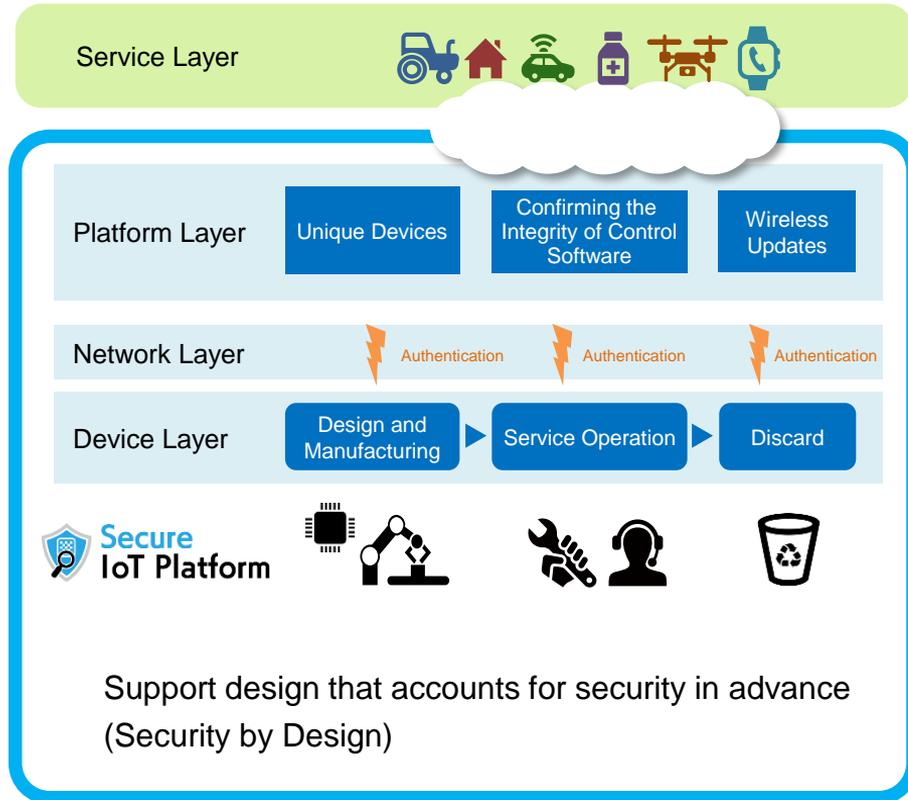

- Remote-controlled nursing care support
- Integration with automated door sensors
- Haneda Airport robot test

Healthcare-related

- Acquisition and analysis of bio-information through IoT devices attached to a belt
- Safe transmission of bio-information

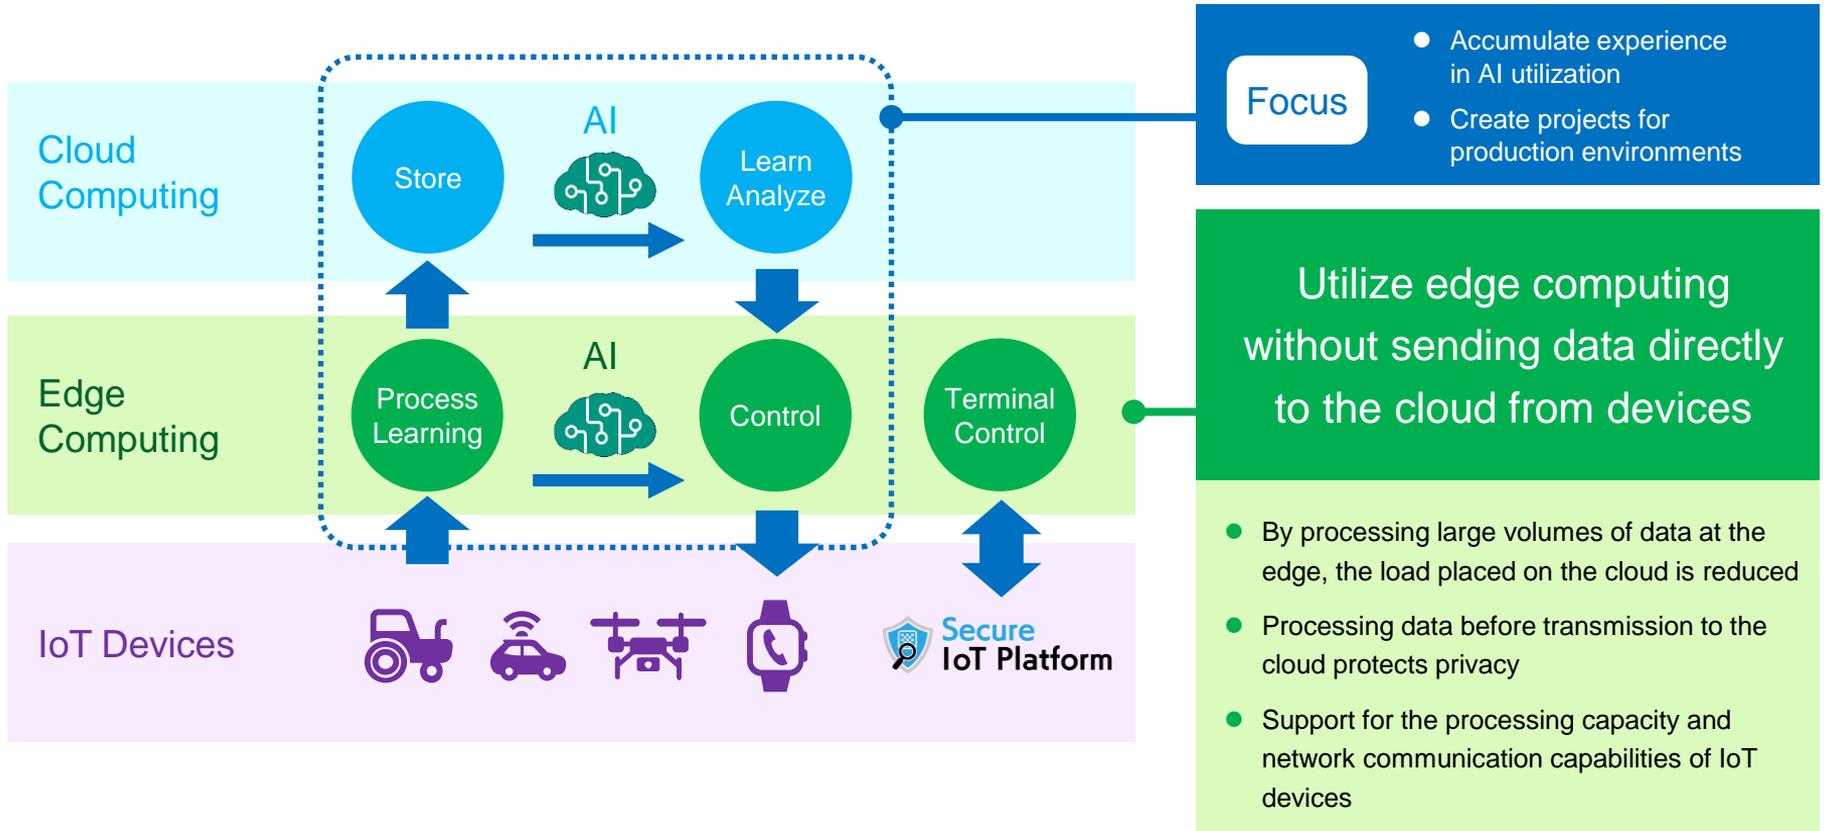

Policies that provide value to the manufacturing and construction fields

Progress in the Area of IoT Devices

Combine subsidiaries
and strengthen into infrastructure services
that provide safety throughout
the entire IoT device lifecycle

Policies in Cloud & Data Areas

Example: Demonstration Testing of an IoT-enabled Building

Seeking development of a solution incorporating security resistance in conjunction with Takenaka Corporation

Introducing IoT in a building enables device monitoring, management and control

Reduces energy and management costs

However, connecting devices to the network exposes them to the risk of cyber-attacks

Air Conditioning

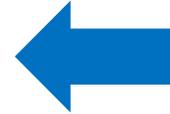

Lighting

Elevators

Disaster Prevention and Security Facilities

Vulnerability diagnosis using cyber-attack tests

Vulnerabilities discovered in the network and controllers that control equipment (devices)

Build a Solid Profit Structure

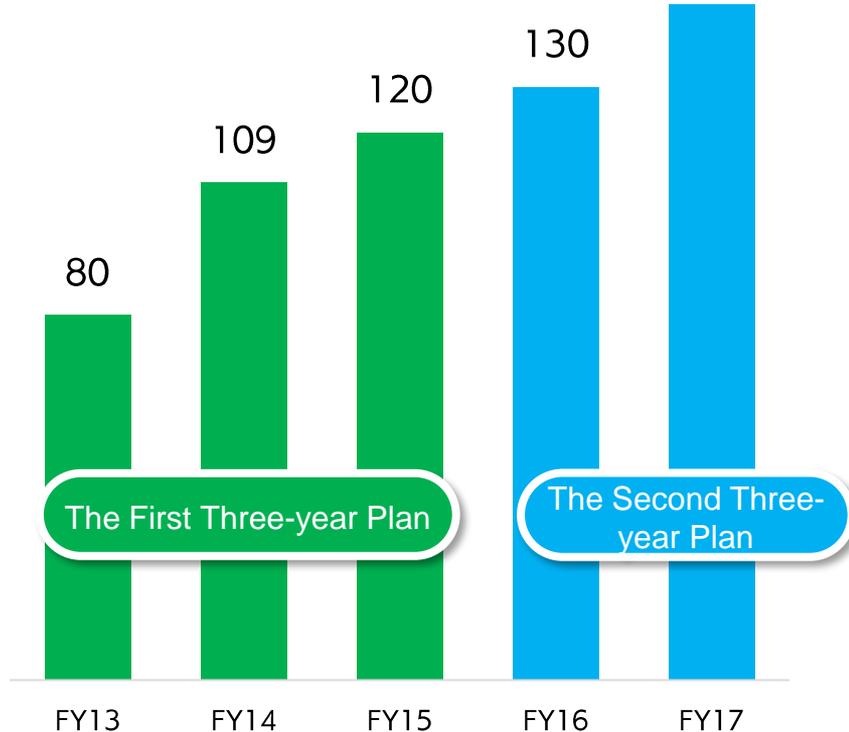

Strengthening Stock Businesses

Maximizing Project Revenue
Boosting Profit Margins from Services

Workstyle Reform and
Measures to Prevent Overwork

Strengthening Stock Businesses (Operational Services Except for EC)

Sales from Stock Businesses **148**

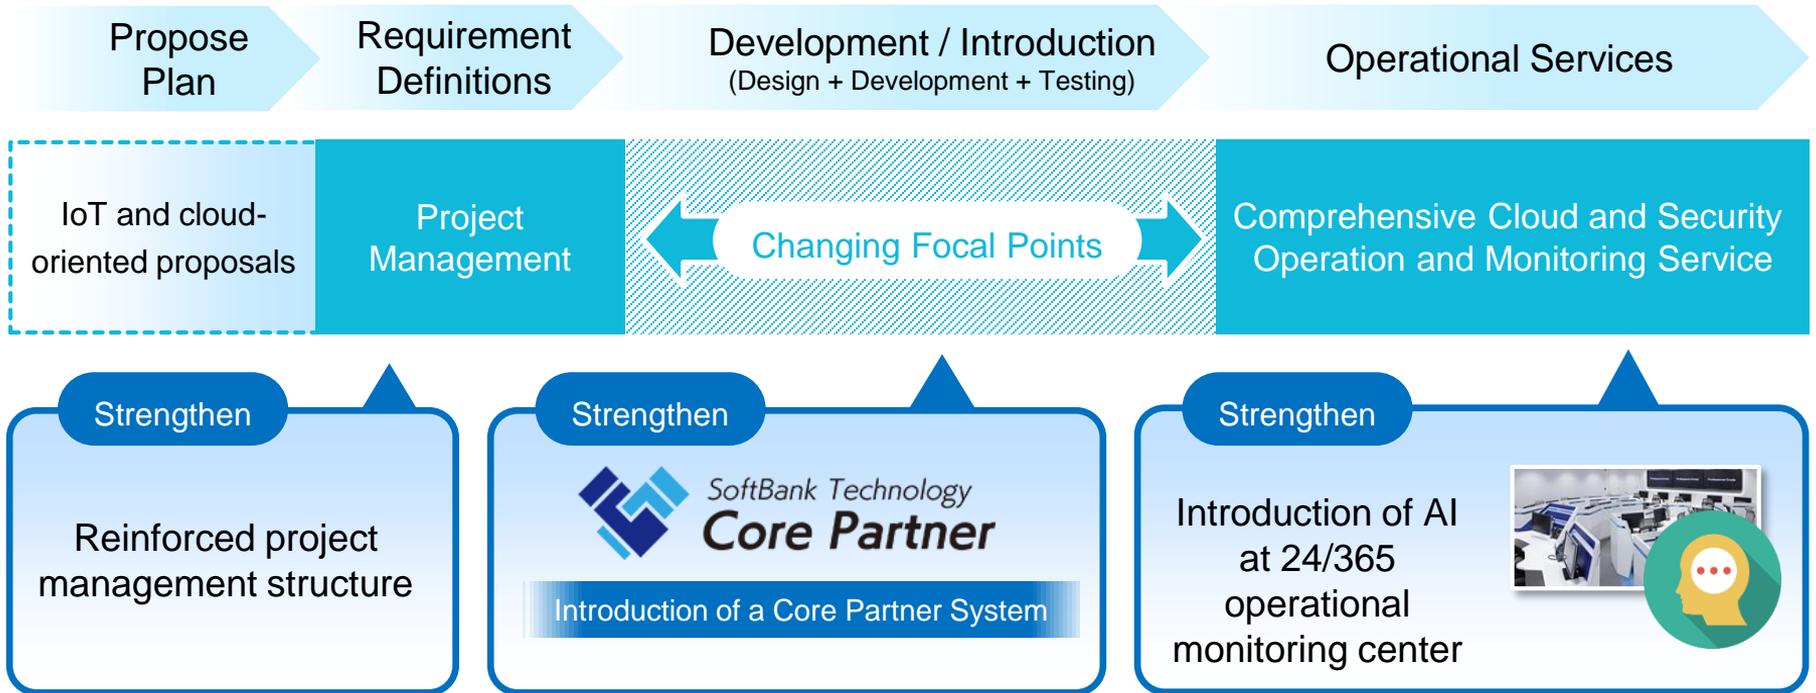

Promote development of
businesses into services

Stock businesses
have roughly doubled
over five years

Maximizing Project Revenue and Boosting Profit Margin from Services

Workstyle Reform and Measures to Prevent Overwork

Workstyle Reforms

On/off switching

Providing variety to keep workers refreshed

- Flextime system without core time requirements
- Project completion leave
- No overtime days / Premium Fridays, etc.

Growth Support

Securing and retaining talented human resources

- Grade skipping system for new employees
- Certification acquisition support
- Obtaining the highest grade of “Eruboshi” certification based on the Act on Promotion of Women’s Participation and Advancement in the Workplace, etc.

Use of ICT

Reduction and creation of time

- Sharing information across the organization
- Use of web meetings, mobile devices

Reducing Overtime

41.8 hours

FY2015

27.7 hours

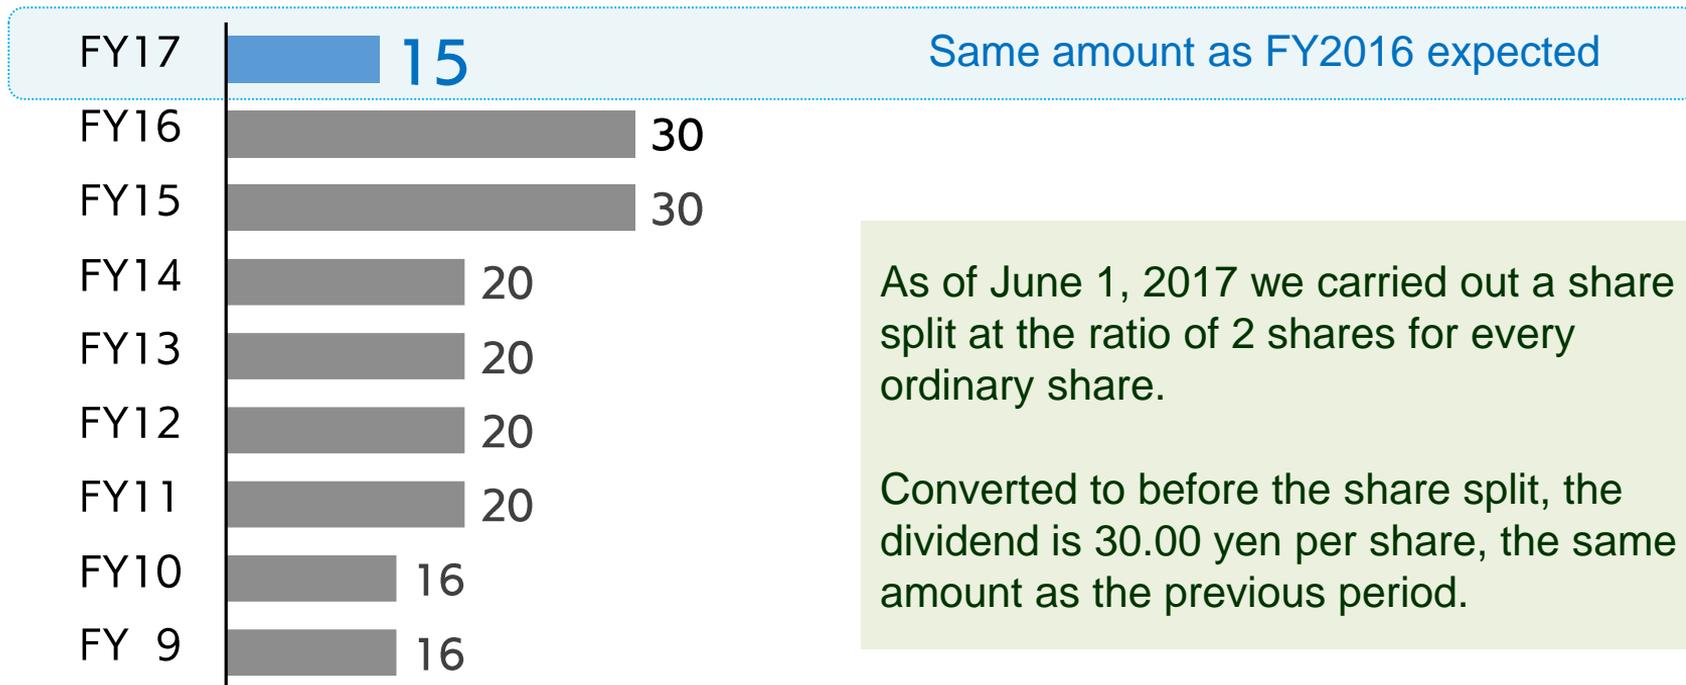

FY2017

Review operations and
utilize time effectively
