2. Reasons for revisions

Digitization is accelerating due to the impact of the COVID-19 pandemic, in addition to demand from companies in Japan for the use of digital technology to enhance their competitiveness, and companies' appetite for DX investment is further increasing. By seizing such opportunities, the Company is developing and operating large digital government projects and expanding system development for SoftBank Corp. and the range of operation projects as a strategic system integrator.

Taking into account the consolidated financial results for the first half of the fiscal year under review and the current trends in orders, the Company has decided to revise its full-year consolidated financial forecasts upward based on the outlook that net sales, operating income, ordinary income, and profit attributable to owners of parent are all likely to exceed the initial forecasts.
